					90
					Part N°
					130004

ACO's products include materials for civil construction with features and functions: specific technical actions for each application. Its use must be guided by projects developed by qualified professionals who consider the particularities of each project.

To meet the load classes of the projects, the foundations must have sufficient support capacity to guarantee the stability of the structure and the ACO channels must be installed according to the installation sections. For more information, please contact the Technical Department.

ACO MONOBLOCK RD200V 0.0 - F900
