Start Your Specification Here

**NOTES:**

1. Specific site conditions may require an increase in these dimensions or reinforcement. It is the customer's responsibility to ensure the concrete encasement is designed for the application. *Engineering advice may be required.*
2. A minimum concrete strength of 25MPa is recommended. The concrete should be vibrated to eliminate air pockets.
3. The finished level of the concrete surround must be flush with the top of the frame.
4. Expansion and crack control joints are recommended to protect the pit and the concrete surround. *Engineering advice may be required.*
5. Refer to ACO's latest installation instructions for complete details.
